Are you at risk for COLON CANCER?

If you're 50 or older, the answer is YES.

Most colon cancers occur in men and women who are 50 or older. So if you are in that age group, you can be at risk or have the disease and not even know it — even if you have no family history of colon cancer.

Talk to your doctor about getting tested. For more information, contact the American Cancer Society at **1.800.ACS.2345 or visit www.cancer.org.**
