

Honda of America Mfg., Inc.

The health and safety of more than 12,500 associates is the top priority at Honda of America. We believe that the support of healthy lifestyle habits leads to major benefits for our associates – both in their personal lives and as valuable members of the Honda team.

We not only promote proactive health awareness and education, but we also provide state of the art recreation and fitness facilities. The proactive health and well-being of our associates is why we make available early intervention programs, massage therapy and other rehabilitation services.

Our commitment to promote healthy lifestyles is a big part of why we are pleased to be part of the Healthy Ohio Business Council. Honda applauds the Healthy Ohio effort. We believe this is a critically important step to meeting the growing health care challenges facing all Ohioans.

On behalf of all Honda of America associates, we thank you for the opportunity to join the Healthy Ohioans initiative. We are truly honored to be part of the Healthy Ohio Business Council.

**Akio Hamada,
President and CEO**
