OH5703012	Jefferson Regional Water Authority	4,500	Deficient	0.53		
OH5703512	Dayton Public Water System	166,000	Adjusted			
OH5703612	Huber Heights Public Water System	36,953	Adjusted			
OH5703715	Oakwood Village MHP	1,500	Purchase		OH5701503	Montgomery County Water System 2 PW
OH5749812	Clayton WTP PWS	71	Purchase		OH5703512	Dayton Public Water System

Montgomery County

Ohio Public Water System Fluoride Levels, 2012

How to use this table:

Fluoridation Status: **Adjusted:** The natural fluoride level is adjusted to the optimum level for good dental health. [Click](#) for information about optimum fluoride levels.
Deficient: The natural fluoride level is below the optimum level for good dental health.
Natural: The fluoride level is naturally at optimum or higher levels.
Purchase: The water system purchases optimally fluoridated water from another public water system.

Fluoride Level: The fluoride level is provided for systems that do not adjust or purchase. Fluoride concentration is measured in parts per million (ppm) or milligrams per liter (mg/L).

Purchase From: The PWS ID indicated can be traced back to the original source of purchased water. The first two letters identify the state. The first two digits of the PWS ID identify the county in alphabetical order ([click](#) for a list of Ohio counties by code). The last five digits identify the system.

Please Note:

*Some water systems have fluoride levels tested at commercial labs that report levels of fluoride that are less than 0.5 ppm as "<0.5ppm." This is NOT specific enough for purposes of prescribing fluoride supplements. Health professionals should contact their local water plant in order to obtain more specific information on low fluoride levels.

**Public water systems comprise only a proportion of water systems that serve a county population. Some areas are served by non-community water systems.

The fluoride levels in the drinking water provided by public water systems which do not add supplemental fluoride are assumed to be the same as the natural fluoride content of the source water since typical water treatment or storage processes are not expected to remove fluoride.
