MEMORANDUM

To: All Licensed Lead Abatement Contractors
All Licensed Lead Abatement Project Designers
All Approved Lead Training Providers

From: David E. Holston, Section Chief 

Subject: Electronic Lead Abatement Project Inspection Report

Date: April 18, 2014

The Ohio Department of Health (ODH) Environmental Abatement Section has developed an Electronic Lead Abatement Project Inspection Report which the Section will start using in the spring of this year. This report contains the same basic information that is found in the current paper report form. ODH inspectors will enter the project inspection information into mobile devices onsite. All new license cards will include a barcode containing the licensed person's name and card number which will be scanned into the report on site by the ODH inspector. At the completion of the inspection the report will be signed electronically on site by both the Lead Abatement Contractor or their onsite representative and the ODH inspector. The report will be emailed to the contractor using the email address that was submitted in their current application. At the same time the report is emailed to the contractor it will also be uploaded directly into the ODH database eliminating the need for data entry. The use of the electronic inspection report will increase efficiency both at the project site and in the office. An example of the new report is attached.

Please call the Lead Program at 877-668-5323 or 614-466-1450 with any questions or concerns that you have regarding the electronic inspection report.
