

# Invitation to join... State Council 2.0

## Sustaining IPAC

Improving health outcomes in SE Ohio is best achieved through a locally-designed and locally-driven system of care. IPAC has served a central coordination and planning body for the region for 10 years. The Family Navigator Program, Integration of Behavioral Health/Primary Care, Southeastern Ohio Interdisciplinary Assessment Team (IAT), Developmental Screening, and Pathways all have been developed through IPAC. You, through Project LAUNCH, have linked IPAC to state initiatives that have further invested in our region. You, through the State Council have joined IPAC, bringing leadership and valuable opportunities to the region. Please continue to be involved as we move the HRSA grant forward to ensure we sustain IPAC and the programs it develops. Quarterly meetings to begin early spring 2015.
